L1 ANSWER 1 OF 1 CAPLUS COPYRIGHT 2006 ACS on STN

ACCESSION NUMBER: 2002:167930 CAPLUS

DOCUMENT NUMBER: 136:185632

TITLE: Method for manufacturing low molecular polysaccharide and oligosaccharide thereof

INVENTOR(S): Cho, Suk Hyeong; Kim, Kong Su

PATENT ASSIGNEE(S): S. Korea

SOURCE: Repub. Korean Kongkae Taeho Kongbo, No pp. given

CODEN: KRXXA7

DOCUMENT TYPE: Patent

LANGUAGE: Korean

FAMILY ACC. NUM. COUNT: 1

PATENT INFORMATION:

PATENT NO.	KIND	DATE	APPLICATION NO.	DATE
-----	----	-----	-----	-----
KR 2000036332	A	20000705	KR 2000-5039	20000202
PRIORITY APPLN. INFO.:			KR 2000-5039	20000202

AB A manufacturing method of low mol. polysaccharide or oligosaccharide thereof is provided; said method saves time and money by using titanium oxide as photocatalyst. The low mol. polysaccharide or oligosaccharide thereof can be used in foods, cosmetics, medicines; 0.5-20 weight% of polysaccharide such as chitin, chitosan, pectin, inulin, cellulose, gum, starch, glycogen, heparin, etc. is solubilized in a proper solvent such as distilled water. 0.01-5 Weight% of photocatalyst such as titanium oxide, zinc oxide, iron oxide, cadmium sulfide, zinc sulfide or hydrogen peroxide is added to the polysaccharide solution (or powder), and then said solution or powder is exposed to UV light or radiation (alpha, beta or gamma ray) or electron beam.

AB A composition of glycosaminoglycans and zinc derivs. and its application to accelerate wound healing and to reduce pruritus resulted from insect bites, stings and the like are disclosed. An effective amount of zinc derivs. in the range of 1-20 mg/g is admixed with an effective amount of glycosaminoglycan, such as heparin derivative, in the range of 100-300 USP units/g in a gel for topical application on the affected area. Suitable non-medicinal carriers selected from the group consisting of CM-cellulose, glycerin, methylparaban, polysorbate, propylparaben and water may be added to the gel composition

AB A cosmetic composition comprises an enhanced colloidal oatmeal which utilizes other Avena sativa ingredients to neutralize the discomfort, irritation and inflammation of the skin, as well as to maintain normal skin. The composition can be used to treat many types of discomforts, including itching due to poison ivy, oak and sumac, insect bites, sunburn, chicken pox, hives, prickly heat, chafing, and the like while maintaining the normal pH of the skin. For example, a loose powder composition contained (by weight) 48.96% colloidal oatmeal, 1.53% oat β -glucan,

0.51% hydrolyzed oat protein, 45.99% topical starch, 1.0% zinc
oxide, 0.005% fragrance, and 2.0% tricalcium phosphate.
